DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of bonding surfaces, classified in class 156, subclass 60.
- II. Claims 11-16 and 21-27, drawn to a method of laminating substrates, classified in class 156, subclass 299.
- III. Claims 17-20, drawn to cured epoxy material for bonding, classified in class 528, subclass 23.
- IV. Claims 28-31, drawn to an ultrasound transducer array, classified in class 310, subclass 334.

The inventions are distinct, each from the other because of the following reasons:

Inventions of the groups are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2834

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Direct inquiry to Examiner Dougherty at (571) 272-2022.
